**DETAILED ACTION**

***Allowable Subject Matter***

Claims 31-34 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art known to the Examiner is listed on the PTO 892 form of the previous Office action. None of the references or combinations thereof disclose a method of preventing diffusion from a copper conductive layer through an underlying tantalum comprising barrier layer comprising, among other things, depositing a tantalum comprising barrier layer in a manner such that the tantalum comprising barrier layer is variable in thickness and continuous, wherein *at least a portion of said tantalum comprising barrier layer has a thickness in the range of about 5 Angstroms, but not less than 5 Angstroms* as required in the presently claimed invention. Moreover, the terminal disclaimer obviates the obviousness type double patenting rejection of the previous Office action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
